

Notice for photos for scrap materials

In order to better clarify the process of application for pre-shipment inspection in Australia, please note that commencing on Oct 10, 2008,

1. Customers shall provide 3 digital photos for each container with scrap materials.
2. The first photo displays the scrap materials in the container, with both container doors open.
3. The second photo displays both the scrap materials in the container and container number, with one container door open and the other one close.
4. The third photo displays clearly the seal number.
5. The dimension of each photo shall be standardized to minimum 640 x 480 pixels.

The requirements for 3 digital photos will be implemented to all pre-shipment inspection in Australia effectively Oct 10 2008, which should be strictly followed under any circumstances.

In case of any digital photos with incomplete or inaccurate information, CCIC Australia has the right to reject application.
